

Progress in Cancer Research Lectures

Summer Semester 2016

Thursdays: 9:00 - 10:00
Lecture Theater, DKFZ

Cell Biology and Tumor Biology

- 14/04 Prof. Dr. Stefan Joos
DKTK: A new approach towards translational oncology
- 21/04 PD Dr. Andreas Fischer
Notch signaling in cancer biology
- 28/04 Prof. Dr. Frank Lyko
Epigenetics
- 12/05 Prof. Dr. Hellmut Augustin
Tumors – microenvironment crosstalk
- 19/05 Prof. Dr. Christof Niehrs
Wnt signaling in cancer biology
- 02/06 Prof. Dr. Andreas Trumpp
Stem cells in normal physiology, cancer and metastasis
- 09/06 Dr. Marieke Essers
Hematopoietic stem cells under stress
- 16/06 Dr. Hai-Kun Liu
Visualization and manipulation of tumor heterogeneity
- 23/06 Prof. Dr. Bernd Bukau
Protein quality control in health and disease
- 30/06 Dr. Alexandros Vegiopoulos
Organismal metabolism, stem cell function and cancer
- 07/07 Dr. Thordur Oskarsson
Tumor microenvironment in metastasis
- 14/07 PD Dr. Tobias P. Dick
Redox biology of cancer
- 21/07 Dr. Hans Hombauer
*Studies on DNA mismatch repair in *S. cerevisiae**
- 28/07 Prof. Dr. Ingrid Grummt
Noncoding RNA meets chromatin
